Cloud Platforms/Deployment: Google Cloud, Firebase

Operating Systems: Mac, Windows

Productivity Tools: Google Suite, Microsoft Office, Notion, Asana, Jira

Design: Canva, Figma

PROJECTS

Social Media Dashboard with theme switcher

HTML | CSS | JAVASCRIPT

- Developed a social media dashboard based on a Figma design file from frontendmentor.io, ensuring accurate implementation of the provided design
- Implemented a dark theme mode for the dashboard to enhance user experience, offer visual customization options, and accessibility

Google Clone

REACT | MATERIAL UI | API

- Developed a fully functional clone of Google using React
- Integrated the Custom Search JSON API to enable dynamic search results and real-time suggestions

Restaurant Reviews Site

REACT | REACTSTRAP | FONT AWESOME

- Developed an immersive website where users can explore and view a fictional restaurant brand that features four of its restaurants
- Utilized React components and Reactstrap to create a responsive and visually appealing user interface
- Employed Canva to design and create all logos, enhancing the overall aesthetic of the website
